Education

International Institute of Professional Studies(IIPS), DAVV University Indore

Master of Computer Applications 5year(BCA+MCA) Integrated Course

Shrikanwartara Public Higher Sec. School, Mandleshwar

CBSE (10+2)

St. Mary's Senior Secondary School, Barwani

CBSE (10)

Work Experience

Ceeras IT Services

Feb 07, 2025 – June 10, 2025

Cybersecurity Intern

(Remote)

- Contributed in identifying and fixing minor security bugs in web applications.
- Gained hands-on experience with the fundamentals of Cybersecurity and secure coding practices.

Indore Municipal Corporation

Jan 8, 2025 - March 8, 2025

Software Development Intern

Indore

- Contributed in developing a Cloud-based chatbot for Indore Municipal Corporation to help citizens verify suspicious links and stay informed about ongoing cyber scams. Chatbot for real-time cyber safety: check URLs, detect threats, and get fraud prevention tips. Designed for seamless public engagement.

Technical Skills

Technical Skills: C++, Python, OOP Concepts, DSA, Leetcode 200+Solved Problems, HTML, CSS, MySQL.

Soft Skills : Teamwork and Collaboration, Quick Learner, Effective Communication, Empathy, Integrity.

Projects

Crop Disease Detection Web-App | Python, Flask, Tensorflow, HTML, CSS

- Built a web application that detects plant diseases from uploaded images using a trained machine learning model. Provides farmers with the name, cause and cure of the disease through an interactive dashboard for quick decision making. Implemented user authentication, JSON-based disease information storage, and a clean and responsive UI.

Chat-Bot | Botpress Cloud | [live](#)

- Developed a Chatbot to help users verify suspicious links, detect phishing attempts, stay aware of ongoing cyber scams, and receive real-time fraud prevention guidance. Integrated features such as URL safety check, scam awareness tips, interactive FAQ support, and instant alerts on potential threats.

Cheating Surveillance System | Python, OpenCV, MediaPipe, PyTorch

- Built a real-time surveillance system to detect cheating during online interviews and examinations using computer vision techniques. Monitors candidate behavior through head movement, eye tracking, and mobile phone detection, providing instant alerts for suspicious activities. Implemented facial landmark detection using MediaPipe and object detection using YOLOv8 (Ultralytics) with PyTorch. Developed a responsive interface for real-time monitoring and efficient proctoring.
